EDUCATION

University of California, San Diego

M.S., Computational Social Science, 4.0/4.0 GPA

Relevant Courses: Statistical Methods, Text as Data, Neural Networks and Deep Learning

La Jolla, CA

Expected June 2026

The University of Hong Kong

M.S., Marketing, 3.5/4.3 GPA

Relevant Courses: Applied Marketing Research & Metrics, Big Data Consumer Analytics

Hong Kong SAR

Graduated July 2022

Peking University

B.A., Advertising, 3.6/4.0 GPA

Relevant Courses: Calculus, Communication Research Method, Principle of Economics

Honors: May 4th Scholarship of Peking University (2018), Academic Excellence Award (2020)

Beijing, China

Graduated July 2021

TECHNICAL SKILLS

Statistical Analysis & Modeling: Supervised and unsupervised learning, regularization (Lasso/Ridge), tree-based models, T-tests, ANOVA, regression analysis, model evaluation

Programming: R, Python, SQL; experience with scikit-learn, Pandas, NumPy, PyTorch

Data Analysis & Research: Data cleaning, exploratory data analysis, hypothesis-driven statistical testing

Data & Visualization: Matplotlib, Seaborn, Tableau, Power BI

PROFESSIONAL EXPERIENCE

The University of Hong Kong

Program Manager, Admissions Data Analytics

Management Trainee

Hong Kong SAR

Dec 2024 – June 2025

Sep 2023 – Dec 2024

- Selected as one of 7 candidates from 700+ applicants for HKU elite management trainee program
- Led data wrangling and analysis (~30,000 entries) using advanced Excel formulas and pivot tables to provide longitudinal and comparative application trends and shortlist applicants
- Designed and maintained interactive dashboards with Excel and Power BI integrating multiple data sources for benchmarking, enrollment estimation and diversity metrics monitoring, informing strategic admission decisions
- Collaborated with technical teams to design and evaluate a student support chatbot on Power Virtual Agent, applying topic modeling (LDA) on query patterns to identify information needs and achieved 85%+ goal completion post-launch

Sandpiper

Account Executive

Hong Kong SAR

June 2022 – Feb 2023

- Conducted statistical analysis using R on survey data from 8,087 respondents across 8 countries, employing T-tests and ANOVA to identify demographic and socio-economic patterns; produced data-driven insights for a 50-page published report on digital lifestyle
- Developed market-specific data snapshots and visualizations for a consumer expectation survey, identifying country-specific data highlights, enabling tailored distribution of survey findings in different markets
- Compiled monthly Media Monitoring and Analysis Reports, summarizing key news coverages and policy updates related to COVID-19 oral antivirals across the region, sharing trends and opportunities
- Synthesized relevant literature and academic publications for the development of a public health policy white paper

RESEARCH EXPERIENCE

UC San Diego

La Jolla, CA

Research Capstone – Deep Learning for Multilevel Regression and Poststratification

Sep 2025 – Present

- Applied generative deep learning to infer county-level climate opinions from national surveys, extending traditional MRP to handle multiple outcomes and nonlinear interactions
- Designed a three-stage estimation pipeline leveraging latent encoding and demographic poststratification for local opinion distributions

Graduate Researcher – Textual Analysis of Party Influence through Information Disclosure Reports

Sep 2025 – Dec 2025

- Trained and validated supervised text classification models (Naive Bayes, LASSO, Decision Tree) to measure Chinese Communist Party influence in university documents using hand-labeled ideological indicator
- Assembled a Chinese-language text corpus, conducted text preprocessing, model comparison and error analysis to apply predictions at scale to thousands of document snippets

The University of Hong Kong

Hong Kong SAR

Research Project – Emotional Motivator Network and TikTok Marketing

Oct 2021

- Constructed and analyzed emotional motivator co-occurrence networks in TikTok contents using Gephi, discovering patterns relating to brand characteristics
- Performed correlation and Multiple Regression analysis with R to quantify the impact of emotional motivators on viewer engagement

ADDITIONAL INFORMATION

Software: R, Python, SQL, SPSS, Excel, Power BI, Tableau, Gephi

Languages: Mandarin (native/bilingual), English (native/bilingual), Cantonese (native/bilingual)

Research Interests: Statistical Modeling, Public Opinion Survey, Textual Analysis, Public Health
